Catchphrase

"Empowering Every Student with the Right Career Path."

Personalised guidance, data-driven insights and practical next steps for every stage of a student's journey.

What Career GPS AI Does

- Analyses skills, interests and academic profile to suggest personalised career routes.
- Maps clear milestones: short-term actions, internships, and long-term goals.
- Explains rationale using transparent AI signals and confidence levels.

Why Do We Need CareerGPS AI?

Many students face significant challenges when navigating their future career paths, leading to uncertainty and missed opportunities.

1 Career Indecision

Struggling to identify which career path aligns with their interests, skills, and values.

2 Ineffective Skill Development

Investing time in acquiring random skills that may not be relevant to their desired industry or job roles.

3 Missed Opportunities

Overlooking valuable internship programmes and early career opportunities due to lack of awareness or guidance.

4 Placement Stress

Experiencing high levels of anxiety and pressure during placement seasons due to insufficient preparation and direction.

A recent study indicated that 65% of university students feel overwhelmed by career choices. (Source: Higher Education Career Report 2023)

Current Challenges Faced by Students

Many students encounter common hurdles that can hinder their career development and future prospects.

Career Confusion

Students often struggle to identify career paths that genuinely align with their skills and interests.

No Proper Guidance

Limited access to personalised mentorship and professional career counselling.

Skill Gap

A noticeable disconnect between academic qualifications and practical skills required by employers.

Weak Resume

Difficulty in crafting effective resumes and portfolios that stand out to recruiters.

No Internship

Challenges in securing relevant internships, crucial for gaining hands-on industry experience.

Placement Anxiety

High levels of stress and pressure during competitive campus placement drives.

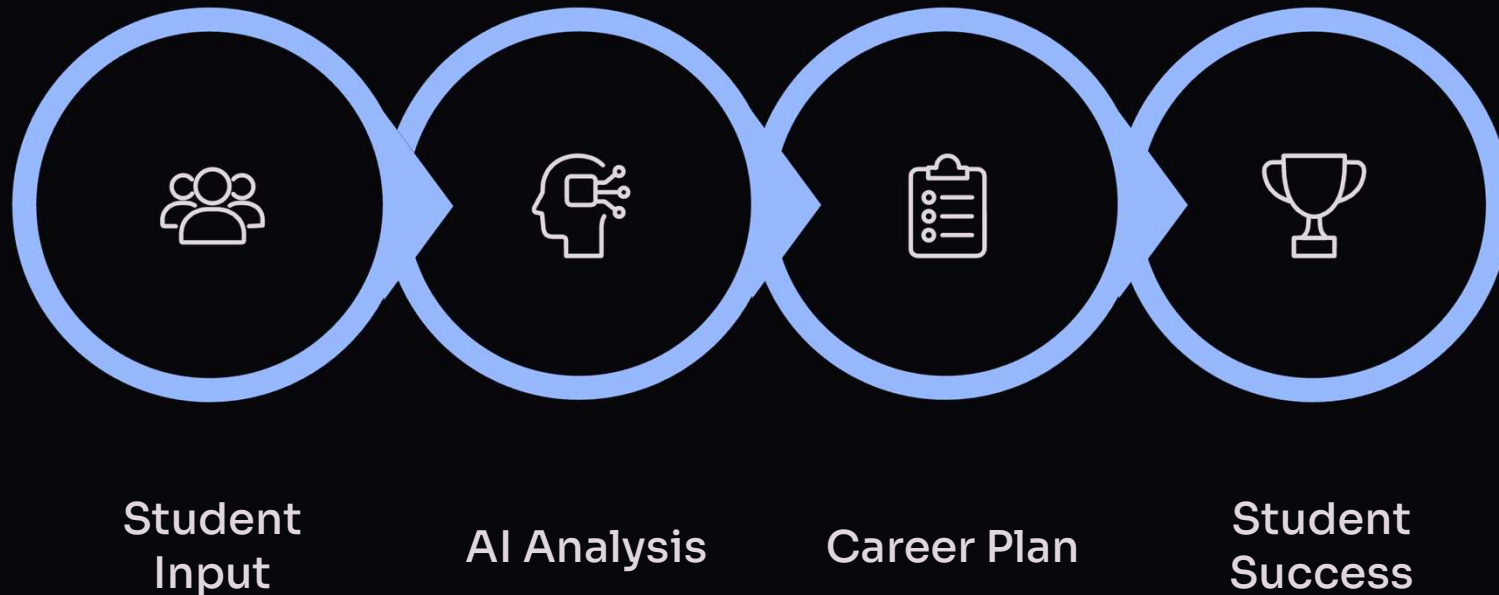

Without proper guidance, students often waste valuable time and effort, leading to unfulfilled potential.

Introducing CareerGPS AI: Your Path to Success

CareerGPS AI is an intelligent platform designed to empower students by transforming uncertainty into clear, actionable career pathways.

- **Personalised Analysis**
Analyzes students' individual interests, skills, and academic profiles to recommend tailored career paths.
- **Skill Gap Identification**
Clearly identifies any missing skills required for desired roles and suggests learning resources.
- **Actionable Roadmap**
Creates a personalised roadmap with short-term actions, relevant internships, and long-term career goals.
- **Continuous Progress Tracking**
Monitors student progress, adapting recommendations as skills develop and interests evolve.

Our Transformative Process

This streamlined process guides students from initial assessment to achieving their career aspirations with confidence.

How CareerGPS AI Works

Our platform guides students through a systematic process, from initial assessment to achieving placement readiness, ensuring every step is clear and supported by AI-driven insights.

This structured approach ensures continuous support and refinement, adapting to each student's evolving profile and market demands.

Key Features of CareerGPS AI

CareerGPS AI offers a suite of powerful features designed to guide students comprehensively through their career development journey.

AI Skill Gap Detector

Identifies specific skills required for your dream job and highlights any areas where you need to improve to meet industry demands.

Example:

Dream Job: Software Engineer

Missing Skills:

- DSA
- React
- AWS

Career Readiness Score

Provides a comprehensive score reflecting your preparedness for your chosen career path, based on skills, experience, and academic performance.

Example:

82/100 (Sample Prototype Output)

Weekly Planner

Generates a personalised weekly study and development plan, optimising time for skill acquisition and academic progress towards your goals.

Example:

- Mon – Python
- Tue – DSA
- Wed – SQL

AI Mentor

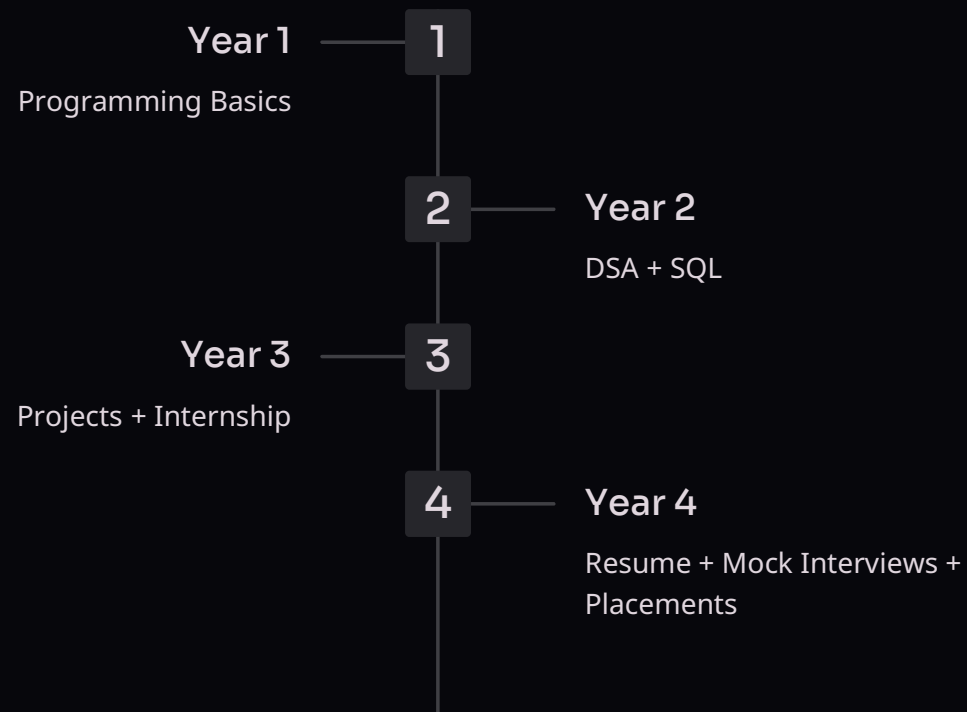

An interactive AI assistant providing instant answers, guidance, and motivation, simulating a personal career counsellor available 24/7.

Example:

"What should I learn next?"

Career Roadmap

Our AI-driven platform crafts a truly personalised learning journey for each student, guiding them through essential milestones year by year.

This structured roadmap ensures continuous development and prepares students thoroughly for their chosen career.

Why CareerGPS AI?

CareerGPS AI delivers multi-faceted benefits, creating a positive impact across the entire educational and professional ecosystem.

Students

Personalised guidance leading to clearer career paths.

Improved confidence in decision-making and future prospects.

Colleges

Enhanced student placement rates and institutional reputation.

Streamlined career support services and resource allocation.

Companies

Access to a pool of highly skilled, industry-ready candidates.

Reduced recruitment costs and faster talent acquisition.

Parents

Clearer understanding of their children's career planning and progress.

Reduced anxiety about future employability and success.

Future Scope

CareerGPS AI is continuously evolving, with exciting plans to expand its capabilities and offer even more comprehensive support to students.

AI Mock Interviews

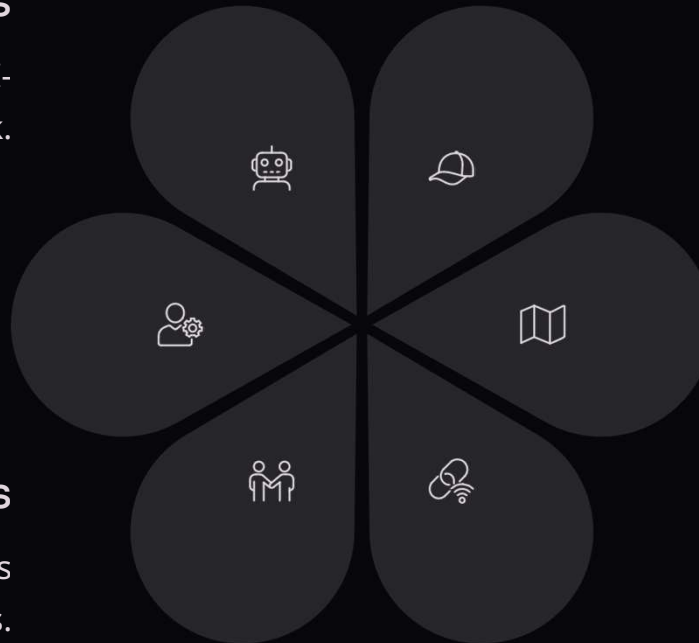

Practice and refine interview skills with AI-powered feedback.

Skill Certifications

Gain recognised certifications to validate and enhance your expertise.

Company Partnerships

Direct pathways to top companies through exclusive collaborations.

Scholarship Finder

Discover and apply for relevant scholarships tailored to your profile.

Global Career Guidance

Access insights and opportunities in international job markets.

Alumni Mentorship

Connect with successful alumni for invaluable industry advice and networking.

Thank You for Your Time

"Every student deserves not just a degree, but a clear direction. Career GPS AI aims to turn uncertainty into opportunity, one personalized roadmap at a time"

"Success is not about choosing the most popular career; it's about choosing the career that's right for you."

Career GPS AI helps students discover their strengths, close skill gaps, and confidently prepare for their future through personalised, AI-driven career guidance.
